(Editors)

Book of Abstracts of the 2nd International Conference on Applied Mathematics and Computational Sciences (ICAMCS-2022)

12-14 October 2022

Organized by

DIT University, Uttarakhand, India

Published by

AIJR Publisher, Dhaurahra, Balrampur, India 271604

Book of Abstracts of the 2nd International Conference on Applied Mathematics and Computational Sciences (ICAMCS-2022) 12-14 October 2022

Editors

Dr Seema Yadav
Assistant Professor,
Department of Mathematics,
School of Physical Sciences,
DIT University, Dehradun

Dr Fateh Singh
Assistant Professor,
Department of Mathematics,
School of Physical Sciences,
DIT University, Dehradun

Dr Jogendra Kumar
Associate Professor,
Department of Mathematics,
School of Physical Sciences,
DIT University, Dehradun

Conference Organizer
DIT University, Uttarakhand, India
Conference Venue
Online (Virtual)

ISBN: 978-81-957605-2-7
DOI: https://doi.org/10.21467/abstracts.138

Type
Abstract Book
Series
AIJR Abstracts

Published
10 October 2022

Number of Pages
158

Copyeditor
Mr. Augustine Gomes

Computational Modelling of Nanofluids Dynamics and Thermal Decomposition in a Microchannel 1

Rayleigh-Benard Convection in Viscoelastic Liquids: New Results in Rectangular and Cylindrical Geometries 2

Some New Trends on Non-singular Fractional Operators 3

Modeling and Analysis of Porous Medium Equations: Existence-uniqueness Results and Asymptotics 4

Numerical Solutions of Some Evolutionary Equations by B-Splines 5

Fractional Calculus: Theory, Method and Applications 6

Alteration in Membrane-based Pumping Flow with Shear-thinning and Shear-thickening Behaviours of the Fluids 7

Adaptive Mesh Construction Using Equidistribution Principle for a Class of Singularly Perturbed Differential Equations 8

On the Comparative Study of Gravity Modulated Rayleigh-Bénard Convection Involving Free-free, Rigid-free, and Rigid-rigid Boundaries 9

Understanding of Chaos and Hyper Chaos in Fluid Dynamics Through the Use of Lyapunov Exponents 10

Fractional Calculus Applications in Image Processing 11

Fractional Derivative Approximations and Applications 12

An Overview of Linear Transformation 13

Inequality and Estimate of Generalized Pseudo-differential Operators Involving Fractional Fourier Transform 14

Controller Design for Non-linearity in PV: A Review 15

On W_{jkh}^{i} in Generalized βP — Recurrent and Birecurrent Finsler Space 16

Numerical Solution of Abel Type Non-linear Fractional Integral Equations Based on Orthogonal Polynomials 17

Benchmarking Efficient Data Exchange Between Office Open XML Spreadsheet File Format and R 18

Mathematics of Nature 20

Entropy Generation Analysis for MHD Non-miscible Micropolar and Newtonian Fluid Flow in a Rectangular Porous Channel 21

Solution of Non-linear Equations Using Newton Raphson and Quasi-Newton Method and Application in Engineering Field 22

Liberation Points of a System of Two Cable-connected Artificial Satellites under Different Perturbations with Time Dependent Constraints in Elliptical Orbit 23

Magnetohydrodynamic Micropolar Fluid Squeeze Film Lubrication between Stepped Porous Parallel Plates 24

Higher Order Finite Difference Symbolic Solutions of Some Differential Equations Using MATLAB 25

Pest-epidemic Prey-predator Model with Stage Structure for Prey with Harvesting 26

Mathematical Modelling on Two Layered Blood Flow in Hepatic Capillary During Dengue Disease 27

Effect of Nanoparticle Size on Its Dispersion in Capillaries Using Power Law Nanofluid Model 28

A Proficient Three-stage Unrelated Randomized Response Model Applying Poisson Distribution Under Probability Proportional to Size Sampling 29

The Double-diffusive Natural Convective Study of an Inverted T-shaped Porous Enclosure under the Influence of an Immersed Circular Object: A Numerical Study 30

An Impact of Creativity and Ingenuity on Liberal Arts with Mathematics 31

MHD Williamson Micropolar Fluid Flow Pasting a non-linearly Stretching Sheet under the Presence of non-linear Heat Generation/Absorption 32

Data Mining Techniques for Dimension Reduction in Healthcare Data 33

Mathematical Modelling Flow Through Thin Curved Pipes with Application to Hemodynamics 34

Solution of Helmholtz Equation Using the Galerkin and Collocation Methods 35

Role of Ordinary and Partial Differential Equations as Mathematical Models in Tumor Growth 36

Rough Approximations Using Fuzzy Ideals of Nearing 37

Some Properties of Hybrid Ideals in Rings 38

Embedding of a Signed Graph with Property *P* in a Graceful Signed Graph with Property *P* 39

Numerical Simulation of Pulsatile Blood Flow Through Healthy and Axisymmetric Stenosed Vertebral Artery 40

A Numerical Solution to a Nonlinear McKendrick-Von Foerster Equation with Diffusion 41

Padmakar-Ivan Type Indices of Titanium Oxide Nanosheet Using Strength Weighted Cut Method 42

Hausdorff Operator on Hardy Spaces 43

Generalized Z-Ricci Soliton on Sasakian 3-manifold with Generalized Z-Tensor 44

Task Allocation for Optimal System Cost Using Hierarchical Clustering in Distributed System 45

Hybrid PSO-GA Based Model for Task Assignment in Distributed Real Time System 46

Square Product Labeling of Cactus Graphs 47

An Exhaustive Assessment on Fuzzy Set Theory with Its Properties and Various Applications 48

A Novel Higher Order Numerical Scheme for Generalized Time-Fractional Burgers' Equation 49

Reviewing the Role of Block Chain in Securing Patient Data for Health Care Application 50

Prediction Accuracy on Automating of Overnight Patient Care 51

The Spherical Fuzzy Data Envelopment Analysis (SF-DEA): A Novel Approach for Efficiency Analysis 52

New Modified Bernoulli Wavelets Matrix Approach for the HIV Infection Model 53

Fractional Relaxation-oscillation Model with Elzaki Decomposition Method 54

Neighbourhood Sets of Some Graphs 55

A Study of Kruskal's Algorithm in Real Road Network of Nagaland 56

A Comprehensive Note on Submatrix Constraint for Inverse Eigenvalue Problem of Symmetric Matrix 57

Natural Cubic Spline for the Solution of Parabolic Equation with Constant and Variable Coefficient 58

On Algebraic and Topological Aspects of ILF-Automata 59

A Review of Recent Approaches to the Variation Iterative Method for a Non-linear Partial Differential Equation 60

Effect of Intellectual Games on the Development of Mathematical Thinking Skills Among Students 61

An Experimental Study on Early Prediction of Heart Disease Using Machine Learning and Deep Learning Approaches 62

A Review of Programming Paradigms Used in R 63

Optimality and Duality for Semi-infinite $h, \varphi - E - convex$ Programming Problem 64

Dust–ion Acoustic Solitary Waves in a Collision Less Magnetized Five Components Plasma 65

Analysis of Heat and Mass Transport in Extended Brinkman Darcy Porous Medium: Triple Diffusive Convection 66

Mathematical Study and Simulation on Stenosed Carotid Arteries with the Help of a Two-phase Blood Flow Power Law Model 67

Rayleigh's Wave Propagate in Semi-infinite Elastic Medium 68

Analysis of Free Vibration of Visco-elastic Square Plate with Circular Varying Thickness 69

Holling Type-II Functional Response in Aquatic Ecosystem Models Shaping Spatial Heterogeneous Distribution of Phytoplankton Data at Tokyo Bay 70

Analytic Approximate Solution for Harmonic Oscillator Equation with Fractional Order Damping Term 71

Non-perturbative Approximate Solution of Fractional Riccati Type Equation 72

The Impact of the Ternary Nanofluid in the Heat Exchange of the Stretched Sheet 73

A Review on Application of Ordinary Differential Population Model 74

A Study of Even and Odd Labeling on Some Classes of Graph 75

Concentration Modulation Effect on Weak Non-linear Thermal Instability in a Rotating Porous Layer 76

A Mathematical Modelling of Two-phase Coronary Blood Flow in Arterioles with Special Reference to Silent Ischemia 77

Shift of Investors from Equity to Future and Options Segment of the Market 78

New Pool-shrinkage Entropy Estimator for Mean of Exponential Distribution Under Different Loss Functions 79

Topological Characterization and Graph Entropy Measures of Single Layered Cycloarenes and Their Tessellations 80

A Comprehensive Study of Nuclear Science and Energy 81

A Note on Rough Porous Slider Bearings Lubricated with Couple Stress Fluid 82

Mathematical Model on Two-phase Arterial Blood Flow of Human Hepatic Circulatory Sub-system with Special Reference to Malaria 83

Analysis of Various Iterative Methods for Solving Differential Equations 84

On the Propagation of Plane Waves under Strain Gradient Theory of Generalized Thermoelasticity 85

Fractional Order Mathematical Modeling of COVID-19 Disease in Case of Wuhan China 86

Application of Differential Transform Method in the MHD Flow of a Micropolar Fluid Between Two Porous Disks 87

A Review on Complex Number & Its Applications 88

Type-2 QC LDPC Codes and Upper Bounds on the Minimum Distance 89

Hybrid Ideals in Near-subtraction Semigroups 90

Automorphism Groups of Some Graphs Related to Cycle Graph 91

Performance Analysis of Machine Learning Algorithms for the Loan Prediction in the Banking Sector 92

Elastic Cable-connected Satellites System Under Several Influences: Equilibrium Positions of Motion of the System in Circular Orbit of Centre of Mass of the System 94

Joule Heating Effect on MHD Flow of Tangent Hyperbolic Mixed Nanofluid Embedded with MgO and CuO Nanoparticles 95

A High Order Convergent Adaptive Numerical Method for Singularly Perturbed Non-linear Systems..... 96

Stochastic Rumor-spreading Model with Holling Type III Functional Response 97

A Review on Mathematical Models to Study the Growth of Population Over Time 98

Anatomizing the Mathematical Disabilities in Students-biological Factors, Gender Factors, Environmental Factors 99

Numerical Study of Generalized Damped-forced KdV Equation Using Bifurcation Analysis 100

Synthesis of Fuzzy Sets and Its Real Applicability 101

Vaidya Tikekar Type Anisotropic Fluid Star in *F (R, T)* Gravity 102

TOPSIS Method for Decision Making Problems Under Interval-valued Intuitionistic Fuzzy Environment with Completely Unknown Weight Information 103

Proximal and Distal Determinants of Self-triggered Infertility: A Multi-dimensional Construct Exploration in Indian Perspective Across Young Millennial 104

Comparative Investigation of Reactivity, Stability, Structural and Thermodynamic Parameters of Heterocyclic Carboxylic Acids and Their Benzofused Derivatives: A DFT Foresight 105

Software Reliability Growth Model For N-version Fault Tolerant Software with Common and Independent Faults 106

Urban Pollution's Impact on the Forest Territory, Wildlife and Human Population: A Mathematical Model..... 107

The Double-diffusive Natural Convective Study of an Inverted T-shaped Porous Enclosure Under the Influence of an Immersed Circular Object: A Numerical Study 108

Predicting Qualitative Behavior of a Tri-trophic Food Chain Model Having Allee Effect on Prey-growth Using Spectral Theory 109

Global Dynamics of a Fractional-order HFMD Model Incorporating Optimal Treatment and Stochastic Stability..... 110

Analysis of Domain Embedding Method for Elliptic Problems Defined Over Curved Complex Domains..... 111

Evaluating Indices Performance Using Different Measures in Context of Bombay Stock Exchange 112

Certain Hybrid Matrix Polynomials Related to the Laguerre-Sheffer Family 113

Application of Empirical Orthogonal Function Analysis on the Salinity of the Bay of Bengal 114

Gravitational Waves and Electromagnetic Field in a Higher Order Theory of Gravity 115

On Hybrid H-Ideals in Hemirings 116

Uniqueness and Stability Results on Non-local Stochastic Random Impulsive Integro-differential Equations 117

Fractals as Julia and Mandelbrot Sets of Complex Cosine Function via Fixed Points Iterations 118

Block Sombor Index and Its Properties 119

Operational Matrix Approach for Distributed Order Fractional Differential Equations 120

Community Detection in Online Social Networks: A Survey 121

An Assessment on Different Approaches to Tie Technique in Pictures and Video 123

Cryptanalysis of RFID Based Authentication Protocol (RSEAP2) for VCC 124

Chebyshev Spectral Method for Volterra Integro-Differential Equations 125
